

Careers with a Purpose

Summary: Your child will learn more about potential careers in an interactive online environment

Age Group: Grades 3rd through 5th

Materials: Computer or Tablet

Instructions:

Entrepreneurs use resources to start their own business. They take an idea and bring it to life. In order to do this, they must be organized and strong team players. They must also work with groups of other people as a team to bring their product or service to market. For example, engineers may help an entrepreneur design and build a new children's toy. Engineers may also help in the creation of the latest iPhone or the newest video game. Professional chefs often work with restaurant owners to create menus and ensure people will want to come to the restaurant. To learn more about careers and how they might interact with others, or to explore new career options, visit <https://www.bls.gov> and select the "Students" tab and then select "Student Resources".
